Department of Engineering Sciences and Humanities (DESH) has been established in 2010. Department provides an encouraging environment to develop the intellectual capacity, critical thinking, creativity and problem solving ability of its students. In first year itself we offer students hands on experience through mini projects to enhance the abilities like problem definition, prototype design, project planning, execution and team work. We ensure that students participate and develop themselves through different platforms e.g. Science Club, Mathematics Club (Ekasutram), Astronomy Club (Antariksha), The Robotic Forum (TRF) etc. This department is always keen to offer students an academic experience of “thinking, learning and doing.”

Department also ensures the enrichment of technical skills, communication and soft skills of students by offering technical writing, communication skills and general seminar courses.

Staff members are encouraged and actively involved in R&D work and have funded research projects, research publications and text books to their credit. They are also closely associated with students through counseling and guidance for curricular, extracurricular activities etc.

In short, DESH aims at grooming the overall personality of students by integrating education, research, skills, social responsibility, public service and values that are inculcated through a unique blend of sciences, engineering and humanities.

Department of Engineering Sciences and Humanities

Our Faculty

Our faculty members challenge their students, share insights gained through professional experience and communicate the knowledge they've spent a lifetime acquiring. They don't rely on teaching assistants and they're supportive in the classroom.

Testimonials

"It was a great experience at DESH because it provides various subjects like General Proficiency, Open Electives along with engineering and applied science subjects. I also enjoyed the German language. Head and Staff members from DESH are experienced and quite co-operative. Proud being VITian."

Shweta U. Chillure Array
